## Skills

HTML, CSS, Javascript, JQuery, React, Nodejs, Express, MongoDB, Mongoose, SQL, PostgreSQL, Sequelize, Ruby, Ruby on Rails, Git, GitHub

## Projects

### BookLand

BookLand is a Full-Stack web app that was built by Rails as a backend framework, React as a front end, and Postgres as database development. This app authenticates the user and enables them to apply CRUD on the book along with putting some reviews and tracks date and time of rented books

### Wanderin' Bard

Wanderin Bard Full-stack web app with full CRUD functionality build by a team of 4 members via git and github collaboration. The app includes user authentication and authorization. Build with React, Nodejs, Express, MongoDB

### MyTutor

Frontend web app designed for tutor seeking students. The app has CRUD and Sort functionality that was build by using React, React Router, Axios, Css and Airtable as the database.

### Quizmate

Frontend trivia game app build with HTML, CSS, Vanilla JS and third-party Api data from Open Trivia Database. Quizmate is a complex App that includes timer as well as some bonuses to apply only once during the game.
